

T-REX

L'ÉPÉE 1839 x MB&F

Inspiration

The inspiration is a result between attachment for this predator that was once dominating the world and biomechanics.

The embodiment of such organic and inorganic elements, the capability to create verisimilitude in the final design is linked to joint forces between masters in their fields: MURANO Glass manufacturer, MB&F, Maximilian Maertens and L'Épée 1839. T-Rex was first introduced to audiences as a unique piece that had been specifically customised for Only Watch, which is none other than the world's most high-profile charity watch auction.

The dinosaur appears through the legs – modelled directly on actual fossilised Tyrannosaurus-Rex bones and especially manufactured and finished to keep this real aspect –, the black hole via the dial – made by Murano Glass manufacturer – and the spaceship via the movement inside the literal time capsule.

Dial in hand-blown
Murano glass

Two slim steel hands arch outwards
from the centre of the Murano glass
dial, indicating the hours and minutes

TIME SETTING

Legs modelled from fossilised
Tyrannosaurus-Rex bones

CLOCK**

T-REX

L'ÉPÉE 1839 x MB&F

Limited Edition

T-Rex comes in three limited editions of 100 pieces each, with Murano glass dials in deep blue, green or red.

Movement

L'Épée 1839 movement, designed and manufactured in-house

Power reserve: 8 days

Balance frequency: 2.5 Hz / 18,000 vph
138 components and 17 jewels

Manual winding

Double ended key to set time and wind movement

Dimensions & Weight

H26,5 x 25,8 x 17,8 cm

2 kg

Materials

Dial : Murano hand-blown glass

Clock: stainless steel, palladium-plated brass and bronze

Finishing

Polishing, satin-finishing and sandblasting
