

# TIME FAST D8

BY L'EPEE 1839 x L'ECAL (Georg Foster)

## Inspiration

When 1950's race cars meet Swiss watchmaking.

This vintage Formula One-inspired race car and a modern clock in one is a kinetic sculpture that tells the time.

The engine consists of a tiered movement with an 8-day power reserve that was entirely developed to hug the curves of the bodywork.

In the cockpit, the car's steering wheel has been specially engineered to adjust the time.

The mechanical movement's barrel is wound by moving the wheels in reverse like a pullback car, to provide the racing machine with the power it requires to remain fully functional.

  
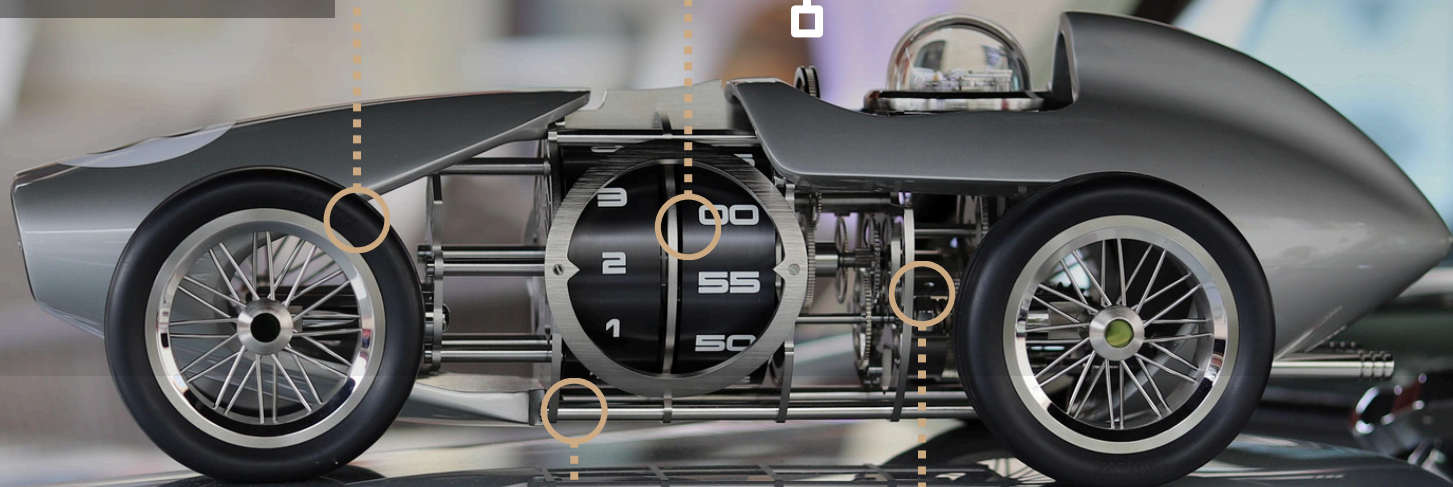

**L'EPEE**  
1839

Hours and minutes displayed on the side resembling a typical competition number

1950's-inspired bespoke wheels with embedded foam

The three spoke steering wheel works as the time setting key

L'Epée 1839 in-house caliber 8 days power reserve

H- shaped chassis as in every racing car at the time

  
**L'EPÉE**  
1839

The escapement and the balance wheel are under a glass dome symbolizing the pilot

Aluminum bodywork with automotive lacquer - each color recalls a specific race team/country

Optional custom engravings

← REWIND JUST LIKE A PULL-BACK CAR
